NELES® ND9000 INTELLIGENT VALVE CONTROLLER

Metso’s Neles ND9000 is a top class intelligent valve controller designed to operate on all control valve actuators and in all industry areas. It guarantees end product quality in all operating conditions with unique diagnostics and incomparable performance features. ND9000 is a reliable and future-proof investment with life-time support.

KEY FEATURES
□ Benchmark control performance on rotary and linear valves
□ Reliable and robust design
□ Easy commissioning and operation
□ Safety; IEC 61508 compliant up to and including SIL 2 by TUV
□ Language selection: English, German and French
□ Local / remote operation
□ Expandable architecture
□ Advanced device diagnostics including
  □ Self-diagnostics
  □ Online diagnostics
  □ Performance diagnostics
  □ Communication diagnostics
  □ Extended off-line tests
  □ Performance view
  □ Online Valve Signature
□ Interchangeable communication options:
  □ HART 6 or 7 (H)
  □ FOUNDATION fieldbus
  □ Profibus PA
□ Limit switches
□ Position transmitter (in HART only)
□ Full stainless steel enclosure
□ Exhaust adapter
□ Remote mounting
□ Arctic version (up to -53 °C / -64 °F)

Total cost of ownership
□ Low energy and air consumption
□ Future proof design allows further options at a reduced cost
□ Optimized spares program minimizes spare part inventory
□ Retro-fit to existing installations (Neles or 3rd party valves)

Options
□ Interchangeable communication options:
  □ HART 6 or 7 (H)
  □ FOUNDATION fieldbus
  □ Profibus PA
□ Limit switches
□ Position transmitter (in HART only)
□ Full stainless steel enclosure
□ Exhaust adapter
□ Remote mounting
□ Arctic version (up to -53 °C / -64 °F)

Minimized process variability
□ Linearisation of the valve flow characteristics
□ Excellent dynamic and static control performance
□ Fast response to control signal change
□ Accurate internal measurements

Easy installation and configuration
□ Same device can be used for linear and rotary valves, double and single-acting actuators
□ Simple fast calibration and configuration
  □ using Local User Interface (LUI)
  □ using DTM / EDD in a remote location
  □ using Distributed Control System (DCS) asset management tools
□ Extensive selection of mounting kits for 3rd party actuators
□ Low power consumption enables installation to all common control systems

Open solution
□ Metso is committed to delivering products that freely interface with software and hardware from a variety of manufacturers; ND9000 is no exception. This open architecture allows the ND9000 to be integrated with other field devices to give an unprecedented level of controllability.
□ FDT and EDD based multi-vendor support configuration
□ Support files for ND9000 are available from our internet pages, at www.metso.com/valves - choose the link: download center
Neles ND9000 in fieldbus networks
□ Approved interoperability
□ Host interoperability ensured
□ FOUNDATION fieldbus ITK version 6.1.2 certified
□ Profibus PA profile version 3.0 PNO certified
□ Easy to upgrade; by replacing the HART communication board with a fieldbus communication board
□ Excellent maintainability with firmware download feature
□ Advanced communication diagnostics
□ Digital communication via the fieldbus includes not only the set point, but also the position feedback signal from the position sensor. No special supplementary modules for analog or digital position feedback are needed when using the fieldbus valve controller.
□ Back up LAS functionality available in FOUNDATION fieldbus environment
□ Input selector and output splitter blocks available in FOUNDATION fieldbus devices allowing advanced distributed control
□ Standard function blocks enables the freedom to use the ND9000 intelligent valve controller in either continuous or on-off control applications
□ Open and close information is directly available via the fieldbus
□ Open and close detection is based on either position measurement (soft limit switch) or mechanical limit switch information

ND9000 mounting on actuators and valves
□ Mounted on single and double acting actuators
□ Both rotary and linear valves
□ Ability to attach options to electronics and mechanics later
□ 1-point calibration feature enables mounting without disturbing the process

Product reliability
□ Designed to operate in harsh environmental conditions
□ Rugged modular design
□ Excellent temperature characteristics
□ Vibration and impact tolerant
□ IP66 enclosure
□ Stainless steel enclosure (ND9300 and ND9400)
□ Protected against humidity
□ Maintenance free operation
□ Resistant to dirty air
□ Wear resistant and sealed components
□ Contactless position measurement

Predictive maintenance
□ Easy access to collected data with Metso DTM
□ Unique Online Valve Signature to detect valve friction even more accurately.
□ Performance view with report, which gives guidelines for recommended actions.
□ Logical trend and histogram collection
□ Information collected during process uptime
□ Extensive set of off-line tests with accurate key figure calculations
□ Fast notifications with on-line alarms
□ Condition monitoring tool available
□ Real time monitoring of valve control parameters

TECHNICAL DESCRIPTION
The ND9000 is a 4–20 mA or fieldbus powered microcontroller-based intelligent valve controller. The device contains a Local User Interface (LUI) enabling local configuration. A PC with FDT/DTM software can be connected to the ND9000 itself or to the control loop.

Advanced self-diagnostics guarantees that all measurements operate correctly. After connections of electric signal and pneumatic supply, the micro controller (μC) reads the input signal, position sensor (α), pressure sensors (Ps, P1, P2) and spool position sensor (SPS). A difference between input signal and position sensor (α) measurement is detected by control algorithm inside the μC. The μC calculates a new value for prestige (PR) coil current based on the information from the input signal and from the sensors. The changed current to the PR changes the pilot pressure to the spool valve. Reduced pilot pressure moves the spool and the actuator pressures change accordingly. The spool opens the flow to the driving side of the double diaphragm actuator and opens the flow out from the other side of the actuator. The increasing pressure will move the diaphragm piston. The actuator and feedback shaft rotate. The position sensor (α) measures the rotation for the μC. The μC using control algorithm modulates the PR-current from the steady state value until the new position of the actuator, according to the input signal, is reached.
**General**

Loop powered, no external power supply required.
Suitable for rotary and linear valves.
Actuator connections in accordance with VDI/VDE 3845 and IEC 60534-6 standards.
Flush mounting on selected actuators

**Action:**
Double or single acting

**Travel range:**
Linear: 10–120 mm / 0.4-4.7 in
rotary: 45–95 degrees. Measurement range 110° with freely rotating feedback shaft.

**Environmental influence**

Standard temperature range: -40° – +85 °C / -40° – +185 °F
Arctic temperature range: -53° – +85 °C / -64° – +185 °F

**Influence of temperature on valve position:**
0.5 % /10 °K

**Influence of vibration on valve position:**
< 1 % under 2g 5–150 Hz,
1g 150–300 Hz, 0.5g 300–2000 Hz

**Enclosure**

Material:
ND9100: Anodized aluminum alloy and polymer composite
ND9200: Anodised aluminum alloy and tempered glass
ND9400: Stainless steel and polymer composite
ND9300: Stainless steel

Protection class: IP66, Nema 4x

Pneumatic ports:
ND9100: 1/4 NPT (ND92000, ND93000 & ND94000)
ND9200: 1/4 NPT (ND90000E2, ND90000U)

Cable gland thread:
ND9000: M20x1.5 (ND90000 )
ND9000E2, ND9000U: 1/2 NPT

Weight:
1.8 kg / 4.0 lbs (ND91000)
3.4 kg / 7.5 lbs (ND92000)
5.6 kg / 12.4 lbs (ND94000)
8.6 kg / 19.0 lbs (ND93000)

**Pneumatics**

Supply pressure: 1.4–8 bar / 20–115 psi
Effect of supply pressure on valve position:
< 0.1 % at 10 % difference in inlet pressure

Air quality:
Acc. to ISO 8573-1
Solid particles: Class 5 (3 – 5 μm filtration is recommended)
Humidity: Class 1 (dew point 10 °C/18 °F below minimum temperature is recommended)
Oil class: 3 (or < 1 ppm)

Capacity with 4 bar / 60 psi supply:
5.5 Nm³/h / 3.3 scfm (spool valve 2)
12 Nm³/h / 7.1 scfm (spool valve 3)
38 Nm³ /h/22,4 scfm (spool valve 6)

Consumption with 4 bar / 60 psi supply in steady state position:
< 0.6 Nm³/h /0.35 scfm (spool valve 2 & 3)
< 1.0 Nm³/h /0.6 scfm (spool valve 6)

**Electronics**

**HART**

Supply power: Loop powered, 4–20 mA
Minimum signal: 3.6 mA
Current max : 120 mA
Load voltage: up to 9.7 VDC/20 mA (corresponding 485 Ω)
Voltage: max. 30 VDC
Polarity protection: active over 35 mA

**Profibus PA and FOUNDATION fieldbus**

Supply power: voltage 9–32 VDC, reverse polarity protection
Max basic current: 17.2 mA
Quiescent Current Draw: 16 mA
Fault current (FDE): 3.9 mA

**FOUNDATION fieldbus function block execution times**

**Performance with moderate constant-load actuators**

Dead band: ≤ 0.1 %
Hysteresis: < 0.5 %

**Local User Interface (LUI) functions**

- Local control of the valve
- Monitoring of valve position, target position, input signal, temperature, supply and actuator pressure difference
- Guided-startup function
- LUI may be locked remotely to prevent unauthorised access
- Calibration: Automatic / Manual linearization
- 1-point calibration
- Control configuration: aggressive, fast, optimum, stable, maximum stability
- HART version configuration: HART 6 or HART 7
- Configuration of the control valve
- Rotation: valve rotation clockwise or counter-clockwise to close
- Dead Angle
- Low cut-off, cut-off safety range (default 2 %)
- Positioner fail action, open/close
- Signal direction: Direct/reverse acting
- Actuator type, double/single acting
- Valve type, rotary/linear
- Language selection: English, German and French

**Position transmitter (optional)**

Output signal: 4–20 mA (galvanic isolation; 600 VDC)
Supply voltage: 12–30 VDC
Resolution: 16 bit / 0.244 μA
Linearity: < 0.05 % FS
Temperature effect: < 0.35 % FS
External load: max 0–780 Ω
Ex ia IIC T6 Ui ≤ 28 V
Ex d IIC T4/T5/T6 Ui ≤ 30 V

VDI/VDE 3845

Linear actuator

ND9300/I, ND9300/K and ND9300/B

Option J
NELES® ND900 INTELLIGENT VALVE CONTROLLER

1.  PRODUCT GROUP
ND Intelligent Valve Controller.

2.  SERIES CODE
9 Series 9000 valve controller with universal shaft and attachment face according to standard VDI/VDE 3845. Relevant shaft adapter included in mounting kits. When valve controllers are separate deliveries, shaft adapter kit is supplied.

3.  ENCLOSURE
1 Standard IP66 / NEMA 4X enclosure.
2 Flameproof (Ex d) IP66 / NEMA 4X enclosure.
3 Stainless steel flameproof (Ex d) IP66 / NEMA 4X enclosure.
4 Stainless steel IP66 / NEMA 4X enclosure, polymer composite cover.

4.  SPOOL VALVE
PNEUMATIC CONNECTIONS (S, C1, C2)

| 02 | Low capacity. Stroke volume of actuator < 1 dm³. | G 1/4 (ND91000), 1/4 NPT (ND92000/ND93000/ND94000). |

5.  COMMUNICATION / INPUT SIGNAL RANGE
H 4–20 mA, HART (6 and 7) communication. Supply voltage 30 V DC. Load voltage: up to 9.7 V DC at 20 mA corresponding to 485 Ω (maximum voltage drop).
F FOUNDATION fieldbus, physical layer according to IEC 61158-2.
P Profibus PA, physical layer according to IEC 61158-2.

6.  APPROVALS FOR HAZARDOUS AREAS
N No approvals for hazardous areas. M20 x 1.5 conduit entry. Temperature range: -40° to +85 °C. Not applicable to 3. sign “20”.

N7 No approvals for hazardous areas. Like N, but this is with Russian language machine plate.

X ATEX and IECEx certifications:
Il I G Ex ia IIC T6...T4 Ga Il II G Ex ib IIC T6...T4 Gb

</tbody>
</table>

### DRIVER SETS

- Driver sets including the needed parts when assembling ND9000 on rotary actuators with VDI/VDE 3845 attachment face, Neles E series actuators or Neles standard mounting faces. Select the correct driver set according to the actuator and the pneumatic connections of valve controller or gauge block when applicable. Note! Earlier the DS04 was delivered with bareshaft positions as default. This practice is no longer valid, the needed driver set must be ordered as an accessory.

<table>
<thead>
<tr>
<th>Code</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>D501</td>
<td>Driver set for ND7100 / ND9100 / ND9400 on actuators with VDI/VDE 3845 attachment face. Set includes the G1/4 plug for single acting actuators. The driver set should also be applied with all ND71 with gauge blocks A1, A2 or A6.</td>
</tr>
<tr>
<td>D502</td>
<td>Driver set for ND72/92/93 on actuators with VDI/VDE 3845 attachment face. Set includes the 1/4NPT plug for single acting actuators. The driver set should also be applied with all ND with gauge blocks A3, A5, A7 or A10.</td>
</tr>
<tr>
<td>D504</td>
<td>General driver set for ND71/72/91/92/93/94 on actuators with VDI/VDE 3845, Neles E-series actuators and Neles standard attachment face (e.g. when replacing NE/NP7 or ND800 with 52 shaft). Earlier default driver set. Includes 1/BNT, 1/NPNT and G1/4 plugs when used with single acting actuators or flush mounted on E-series actuators.</td>
</tr>
</tbody>
</table>

### 3RD PARTY MOUNTING SETS

Mounting sets between the ND9000 generation valve controllers and linear actuators, including bracket and ball joint based feedback system.

Note! Sets are including the pneumatic plugs needed when used with single acting actuators.

<table>
