

Metso service center in Hibbing, MN USA

Metso Minerals Industries, Inc.

3605 East Beltine
Hibbing, Minnesota
55746 USA

The Hibbing service center in Minnesota provides service and solutions to customers in the North central part of the United States. It has the capacity, latest technology and skilled expertise needed to carry out high quality maintenance and repair work for our range of heavy duty slurry pumping equipment.

Bearing assembly service exchange program

To ensure optimum availability and minimum downtime, a service exchange program is in place that covers our various pump ranges. The program assists in ensuring a fast turnaround time for pumps withdrawn from service due to failed bearings.

Defined service procedures

Metso offers you full advantages of our great product knowledge, experience and industry expertise.

All repair and overhaul work is carried out according to Metso's defined service procedures and leaves our service center with an overhaul warranty to be the same level as new manufactured equipment.

The service center covers 10,000 square feet of workshop, storage and office space to further enhance our service and sales activities to our North American customer base.

- Available for all bearing assemblies
- All work carried out according to Metso's defined service procedures by trained personnel
- Repaired with genuine stocked parts
- Exchange stock of common sizes for fast turnaround
- Up to 40 % off the price of new assembly
- 12 month standard warranty

At your service:

"Metso is always committed to the best service standards."
