Flow Control services for Industrial Gas

Welcome to uptime services

Maximize availability

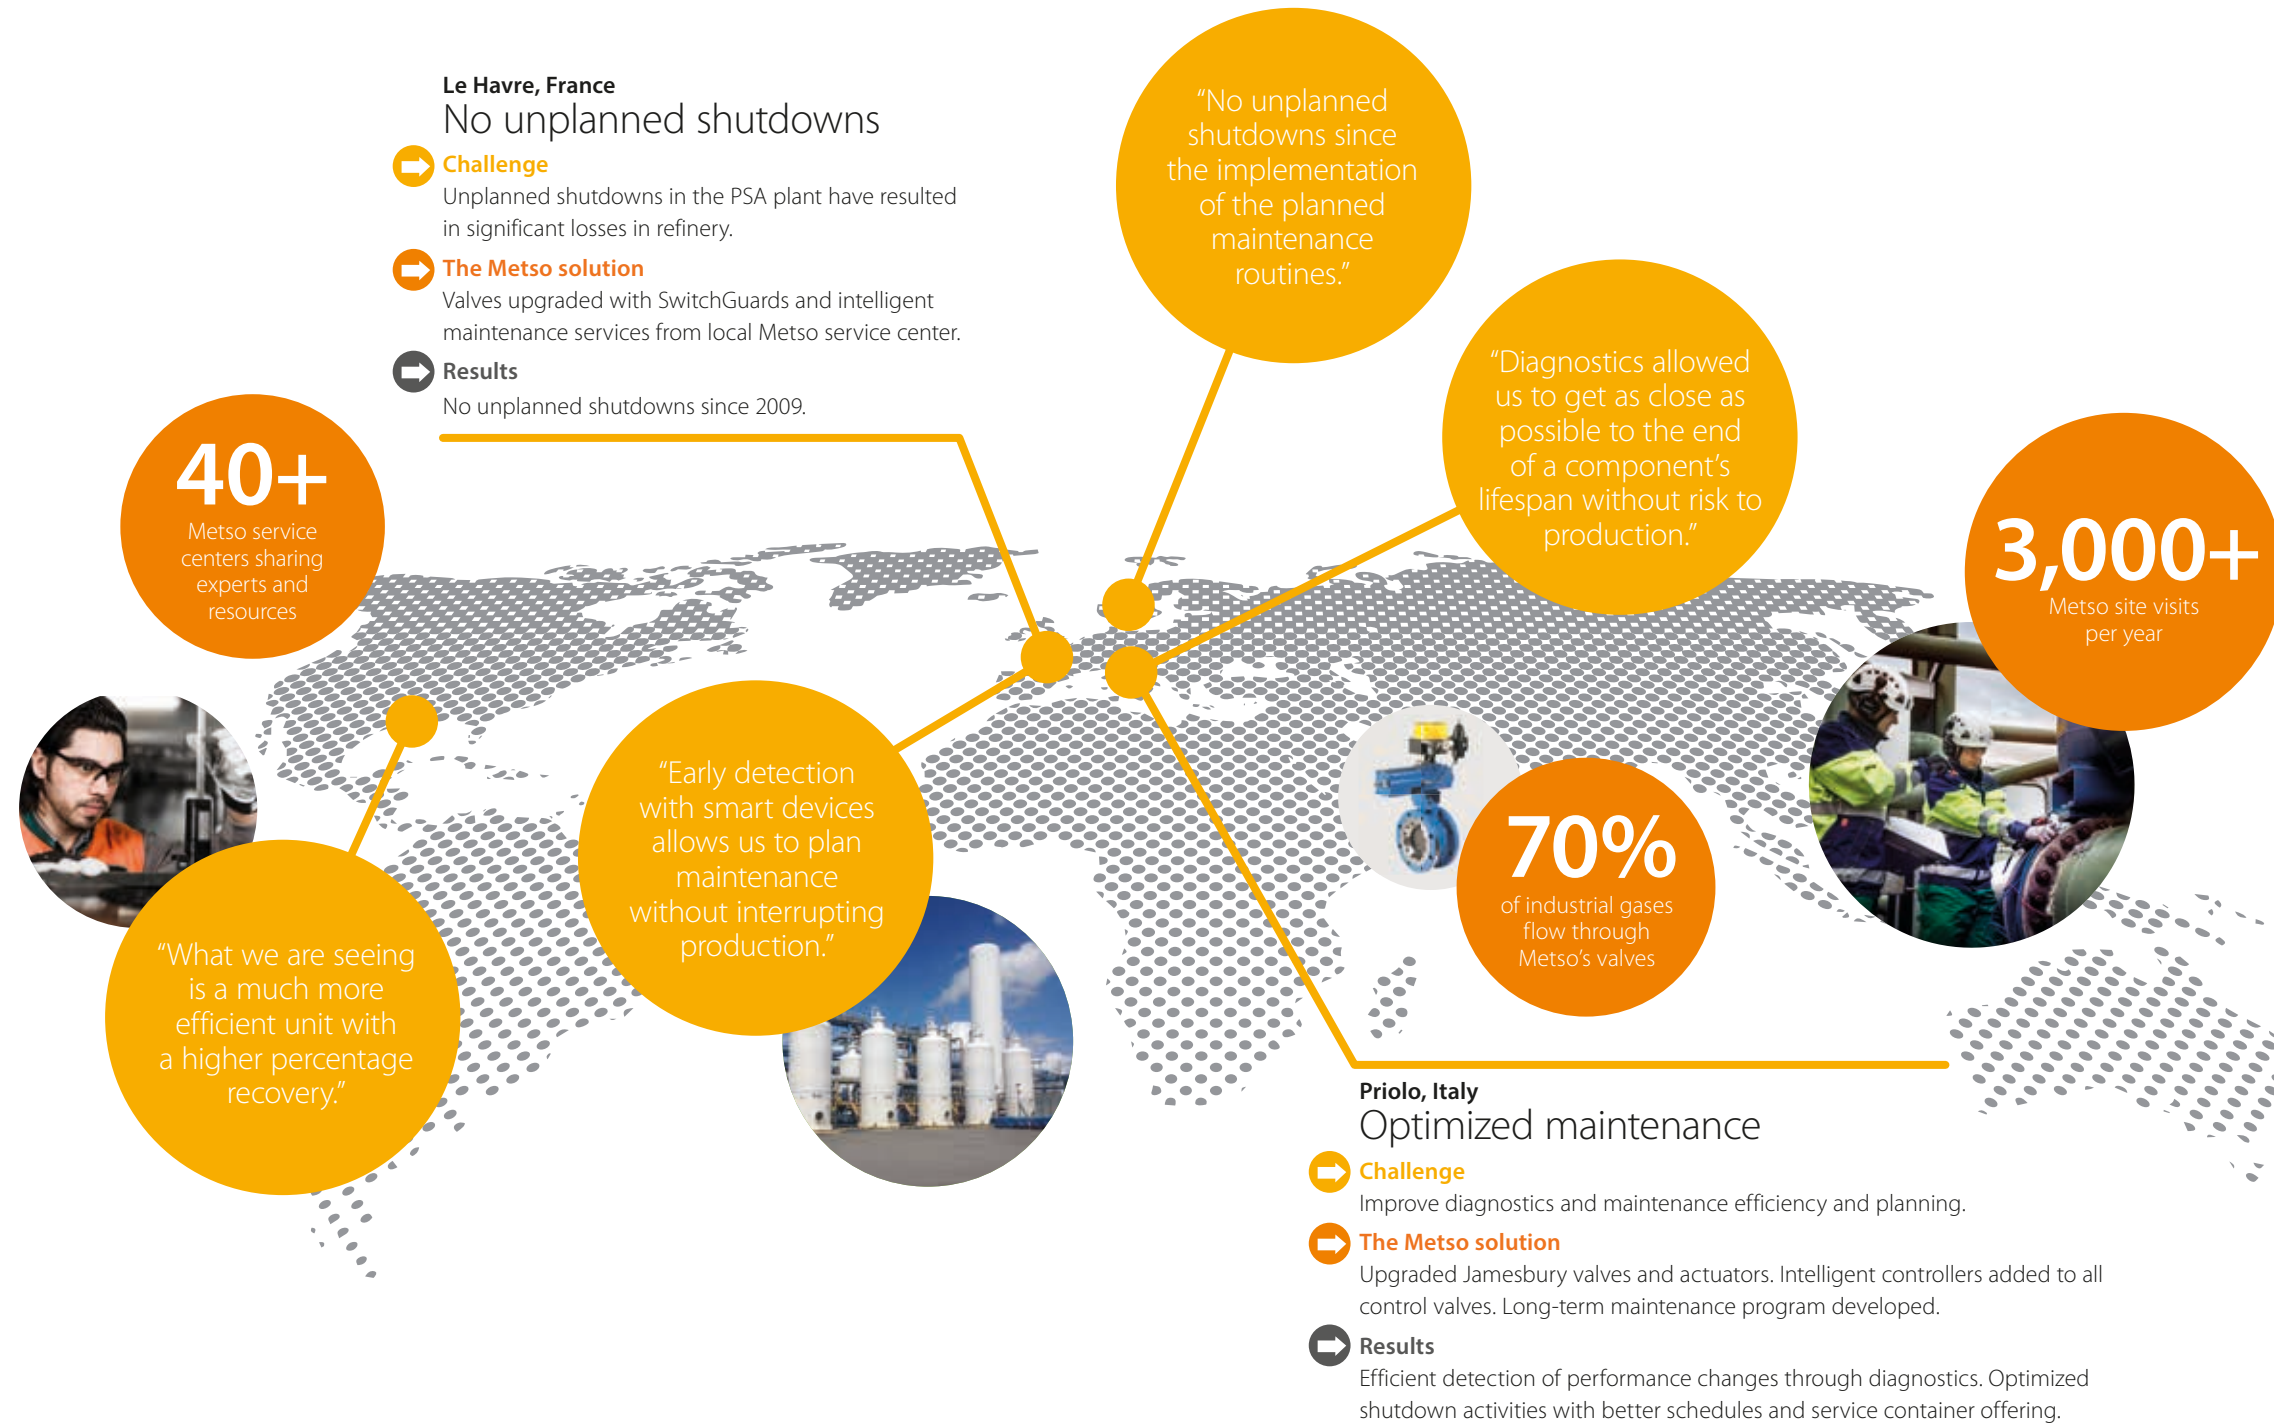

For Industrial Gas producers it is critical to avoid any interruptions of gas supplies to customers and to increase the efficiency of the process to maximize productivity and profitability, while still minimizing maintenance costs.

Metso services and technology to meet your needs:

- Tailored services for PSA and VSA processes, and also for HyCO or ASU plants
- Dedicated relationships with manufacturers and licensors for technological development
- Highly skilled field service experts located near you
- Technical know-how, product support and maintenance strategies
- Smart devices for valve performance and condition monitoring

Service solution for Industrial Gas producers:

Metso services	You get	Your benefits
Installed base and criticality analysis, inventory audit	Maintenance plan 	Optimized use of resources
Modernizations, upgrades and inventory set-up	Harmonized installed base 	Reduced maintenance costs
Genuine spare parts and local Metso service centers	Repairs with warranty 	Extended runtime between shutdowns
Device management	Devices ready when needed 	Maximum availability
Intelligent maintenance	Device condition analysis 	No unplanned shutdowns

Questions and Answers

Does your maintenance strategy efficiently optimize your resources?

Metso service experts will perform an installed based audit and criticality analysis. Recommendations for upgrades and maintenance intervals can be made based on the data to optimize plant’s components, increase availability and reduce maintenance costs.

Does your current service provider offer you repairs warranty?

Metso offers a 12-month warranty on repairs and is certified for oxygen cleaning.

How do you know when valve condition affects your production efficiency?

Intelligent maintenance is based on manufacturer recommendations and valve condition diagnostics to determine the appropriate maintenance.

What about safety considerations?

Valve leakage detection helps customer to save money by increasing plant’s safety and efficiency.

Is your spare parts stock ready for unplanned situations?

Device management guarantees there are always agreed spare parts ready for use. Metso assembles components to build the devices according to your needs.
